pancreas kidney intestine with accompanying chapters on the history of the procedure the donor the recipient and cost analysis covers techniques that explain adequate pretransplant workup and posttransplant care covers cultural differences ethical and legal issues social issues current financial incentives and the illegal organ trade

the dramatic race to transplant the first human heart spanned two years three continents and five cities against a backdrop of searing tension scientific brilliance ethical controversy racial strife and emotional turmoil it culminated in a terrifying moment in the early hours of 3 december 1967 when in a cramped operating theatre in a cape town hospital professor chris barnard stared into an empty cavity from which he had just removed a heart he knew that he had only minutes left to make history and save the life of a 55 year old man by filling the gaping hole in his chest with a heart which had just been beating inside a 25 year old woman every second counts is the story of this gripping race to conquer the greatest of medical challenges it also reveals the truth about the man at the centre of it all whose turbulent life story was just as gripping the kind of true story that would be dismissed as far fetched if presented as fiction it combines an utterly compelling portrait of cutting edge science with raw human drama and shows how the course of medicine itself was changed for ever

with the increased prevalence of kidney transplantation transplant recipients are being treated in a variety of clinical settings often beyond the transplant center there is a greater need for clinicians and allied healthcare professionals to have appropriate guidance on managing these patients kidney transplantation offers the latest evidence based information on the full range of dilemmas in the medical management of kidney transplant recipients before during and after transplantation beginning with the selection of patients who are candidates for transplantation this authoritative guide covers the care of the patient on the waiting list and evaluation of donors preoperative care induction and immunosuppression maintenance this wealth of new information and guidelines will serve as an important resource for the best possible care for transplant patients

this fifth edition of kidney transplantation remains the most comprehensive and definitive text on all aspects of renal transplantation as well as the psychological and ethical issues involved almost every chapter has been revised or rewritten by new authors to incorporate the most essential and up to date information

extensively updated to reflect new concepts in perioperative nursing practice and increased sophistication and complexity of surgical procedures
