the weak property rights regime governing the world's marine resources as well as the wide spread large scale subsidization of the fisheries industry has led to serious depletion of global fish stocks against this backdrop taking cognizance of developing country goals and concerns the fourth ministerial conference of the wto held in doha in 2001 mandated that negotiations over fisheries subsidies formerly subject to the disciplines of the agreement on subsidies and countervailing measures be completed by 2005 in view of this development a country like india with its vast and versatile fisheries resources has to take stock of the state of its fisheries sector and develop a strategic response to the global

debate on fisheries subsidies this book aims to initiate that process it begins by providing an overview of the current state of subsidization of the fisheries sector both domestic and international under various alternate definitions of fisheries subsidies it then focuses on the domestic scenario highlighting the indian experience with fisheries subsidies and property rights regimes across both inland and marine sectors via the case method and investigates the necessity and sufficiency of subsidies vis à vis an appropriate property rights framework in developing the domestic fisheries sector and resource base in a sustainable manner attention is then turned to the international scenario with a review of selected international case studies which can inform domestic subsidy and property rights issues this is followed by an analysis of the country submissions of the various major fishing nations in order to identify india s natural allies and competitors in international negotiations the concluding chapter brings the pieces together it first outlines a program of reforms to rectify the deficiencies in the existing domestic property rights and fisheries subsidy regimes on the basis of intensive interactions with all sectoral stakeholders subsequently it suggests negotiating strategies for india in forthcoming wto meetings an epilogue sums up recent developments and issues

this book is part of a bold new initiative towards global sustainability and development that draws on the disciplines of geotechnical engineering and earthquake geotechnics it contains contributions from fifteen of the world s leading experts who met in kyoto in early 2010 to discuss a range of issues related to the ways geotechnics can help us face the challenges ahead from the technical to the social from geo hazards to megacities from global warming and coastal protection to the conservation of world heritage sites we hope these contributions will stimulate the debate over the role geotechnics has to play in achieving a more sustainable future for the world audience this book will be of interest to advanced levels of researchers and practicing engineers in the fields of geotechnics and earthquake geotechnics for global sustainability the greatest long term challenge of our time

the purpose of the china energy technology program cetp has been to take a holistic view of electricity generation in china with special emphasis on the economic and environmental impact of technology the program is a collaborative effort involving industry as leader and manager of the program researchers from academia and national research institutes and the stakeholders users or planners of the electricity market a power plant no matter of what kind is not a solitary unit which may be considered independently from its environment modern society has been built on easy access to power it is now asking for environmentally clean power clean power is the pathway that will lead to sustainability an extension of the concept of an environmentally clean future progress toward a sustainable technical solution must include an evaluation of the environmental economic and societal impact of electrical power generation to achieve the goals of the cetp program we wanted to go beyond what had been done in similar programs in the past its organizers wanted the program not only to evaluate the overall impact of electricity generation but also do it in such a way that program results could be applied and adapted to different circumstances including countries other than china for this purpose we have developed a methodology and presented it on a dvd disc which the reader will find inside the back cover of this book the methodology is conceived to allow
